Professional Summary

I am Computer Science undergraduate at the University of Colombo School of Computing (UCSC) with hands-on experience in DevOps practices through an internship at StackNet (Pvt) Ltd. Skilled in CI/CD pipeline development, Docker containerization, Kubernetes fundamentals, Linux server administration, GitHub Actions, Cloudflare DNS management, and cloud technologies. Possesses a strong understanding of software deployment automation, infrastructure management, networking concepts, and cloud-native application delivery. Passionate about DevOps engineering, cloud computing, automation, and continuous learning.

Experience

StackNet (Pvt) Ltd

DevOps Engineering Intern

2025 – Present

Colombo, Sri Lanka

- Assisted in designing and maintaining CI/CD pipelines to automate application build, testing, and deployment workflows.
- Worked with Docker to containerize applications and support consistent deployment across development and testing environments.
- Participated in Kubernetes-based application deployments, configuration management, and basic troubleshooting activities.
- Configured and managed DNS records, custom domains, and SSL/TLS certificates to support secure application delivery.
- Performed Linux server administration tasks including service management, log analysis, and deployment support.
- Collaborated with development teams to streamline deployment processes and improve operational efficiency.
- Supported monitoring and troubleshooting of deployed applications to ensure service availability and reliability.
- Gained hands-on experience with cloud platforms, DevOps practices, infrastructure automation concepts, and modern deployment methodologies.

Education

University of Colombo School of Computing (UCSC)

Bachelor of Science in Computer Science (Undergraduate)

2023 – 2026

Colombo, Sri Lanka

Saralankara National College

G.C.E. Advanced Level – Physical Science Stream

2018 – 2021

Galle, Sri Lanka

- Results: 1A, 2B (Combined Mathematics, Physics, Chemistry)

Saralankara National College

G.C.E. Ordinary Level

2017

Galle, Sri Lanka

- Results: 6A, 2B, 1C

Projects

Hotel Menu Manager - Cloud Deployment Project

2025

- Developed and deployed a full-stack hotel menu management application using Gin (Go) for the backend and React for the frontend.
- Containerized the application using Docker and deployed it on AWS EC2 using Docker Compose.
- Configured Linux server environments, networking, security groups, and application environment variables for production deployment.
- Managed PostgreSQL database deployment within Docker containers and performed deployment troubleshooting, monitoring, and maintenance activities.
- **Technologies Used:** Gin (Go), React, AWS EC2, Docker, Docker Compose, PostgreSQL, Linux, Git, GitHub

Hotel Menu Manager - Cloud Deployment Project

2025

- Deployed a containerized full-stack application on AWS EC2 using Docker and Docker Compose.
- Configured Linux server environments, networking, security groups, and application environment variables for production deployment.
- Managed PostgreSQL database deployment within Docker containers and performed deployment troubleshooting and maintenance activities.
- **Technologies Used:** AWS EC2, Docker, Docker Compose, PostgreSQL, Linux, Git, GitHub

Kubernetes Application Deployment

2025

- Deployed and managed containerized applications using Kubernetes in a local development environment.
- Worked with Pods, Deployments, Services, ConfigMaps, and Namespaces while performing cluster troubleshooting and application management tasks.
- **Technologies Used:** Kubernetes, Docker, Linux, Minikube

GitOps-Based Kubernetes Deployment with Argo CD

2026

- Implemented a GitOps workflow using Argo CD to automate Kubernetes application deployments from Git repositories.
- Configured automated synchronization, self-healing, and drift detection for containerized applications running on Kubernetes.
- Integrated Docker, GitHub, and Kubernetes to enable version-controlled and repeatable deployment processes.
- Monitored cluster and application health using Prometheus and Grafana dashboards.
- **Technologies Used:** Argo CD, Kubernetes, Docker, GitHub, Prometheus, Grafana, Terraform

DHCP and DNS Server Configuration

2025

- Configured DHCP and DNS services on Ubuntu Server to provide automated IP address allocation and domain name resolution.
- Performed network configuration, connectivity testing, service management, and troubleshooting of Linux-based network infrastructure.
- **Technologies Used:** Ubuntu Server, DHCP, DNS, Linux Networking

Technical Skills

Programming Languages: Python, Java, JavaScript, PHP, C

DevOps Cloud: Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Linux, Ubuntu Server, Cloudflare, DNS, SSL/TLS, AWS Fundamentals, Google Cloud Platform (GCP)

Infrastructure Networking: DHCP, DNS, TCP/IP, Linux Networking, Server Administration, Network Troubleshooting

Monitoring Observability: Prometheus, Grafana

Development: React.js, Spring Boot, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Maven, Postman

Certifications Professional Development

- **Introduction to Kubernetes (LFS158)** – Linux Foundation (13.1 Hours)
- **Introduction to DevOps and Site Reliability Engineering (LFS162)** – Linux Foundation (8.4 Hours)
- **Introduction to DevSecOps for Managers (LFS180)** – Linux Foundation (20 Hours)
- **Getting Started with DevOps on AWS** – Amazon Web Services
- **Amazon EKS Primer** – Amazon Web Services (2 Hours)
- **AWS Fargate Overview** – Amazon Web Services
- **Introduction to Containers** – Amazon Web Services
- **Introduction to Cloud 101** – Amazon Web Services
- **Linux: Network Configuration** – LinkedIn Learning (2 Hours)
- **Introduction to Cybersecurity** – Cisco (6 Hours)
- **Cybersecurity Awareness: Cybersecurity Terminology** – LinkedIn Learning

Core Competencies

Soft Skills: Team Collaboration, Critical Thinking, Communication, Problem Solving, Creativity, Adaptability
